

# ProductCart®

100s of e-commerce features

Powerful features. Great looking storefronts. Smart management tools.

## Top Quality Shopping Cart Software for Internet Stores

### ProductCart

ProductCart combines hundreds of **powerful e-commerce features** with intuitive management tools that make it easy for anyone to build and manage a professional online storefront.

For years we have been closely listening to our customers. The result is a shopping cart that includes a long list of smart tools that make running your store **faster** and **more profitable**.

Great marketing tools to boost sales and keep customers coming back. Efficient order management features to minimize repeat tasks. A myriad of settings to customize your store to better meet your needs. All of them readily accessible through an intuitive, browser-based administration area.

- ✍ Seamless integration with your Web site
- ✍ Hundreds of sophisticated features
- ✍ Powerful import & export tools
- ✍ Smart marketing tools to increase sales
- ✍ UPS, USPS, FedEx, CanadaPost
- ✍ Dozens of payment gateways
- ✍ Full ASP source code

### ProductCart Build To Order

ProductCart Build To Order is a completely unique ecommerce system that combines the functionality of an online quoting program, a **product configurator**, and a shopping cart. There is simply nothing like it.

ProductCart Build To Order allows businesses to accept quotes and/or sell complex products and services from their Web site.

It's the ideal solution for any scenario in which **customers personalize what they are buying** (custom computers, Web hosting, catering, printing services, custom furniture, industrial machinery, consulting services, etc.). Among its unique features:

- ✍ Sophisticated product configurator (drop-downs, check boxes, radio buttons, required items, default items, item details, item images, etc.)
- ✍ Instant price changes with built-in quantity discount calculation at the item level
- ✍ Default configurations or customize from scratch!
- ✍ Set it up to work as a "request for quote" tool
- ✍ Conflict Management features to prevent incompatible selections

Choose ProductCart for your Clients!
